

Principle

The SUP-Tree makes it easy to attach a projector to a tree or circular vertical support with a diameter of 150 to 250 mm.

Thanks to two straps and two ratchet hooks, you can position a device in just a few minutes in places that are usually difficult to access.

Features

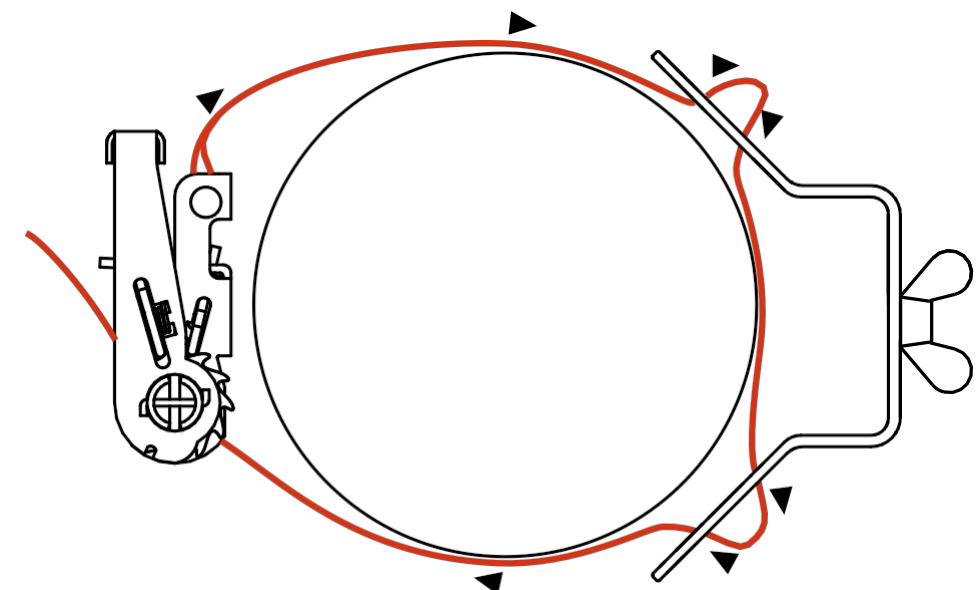

- Bracket for outdoor projectors for poles and trees with a diameter of 150 to 250 mm
- Black powder-coated steel
- Ideal for temporary installations
- Do not use with loads exceeding 50 kg
- The maximum working load depends on the type of assembly
- Always check that the post or tree is suitable for the load
- Always use safety slings when mounting at height
- Weight: 1.36 kg
- Supplied with two attachment straps and M12 and M10 screws

SUP-Tree

Projector mount for attachment to poles or trees with M10/12 fastening

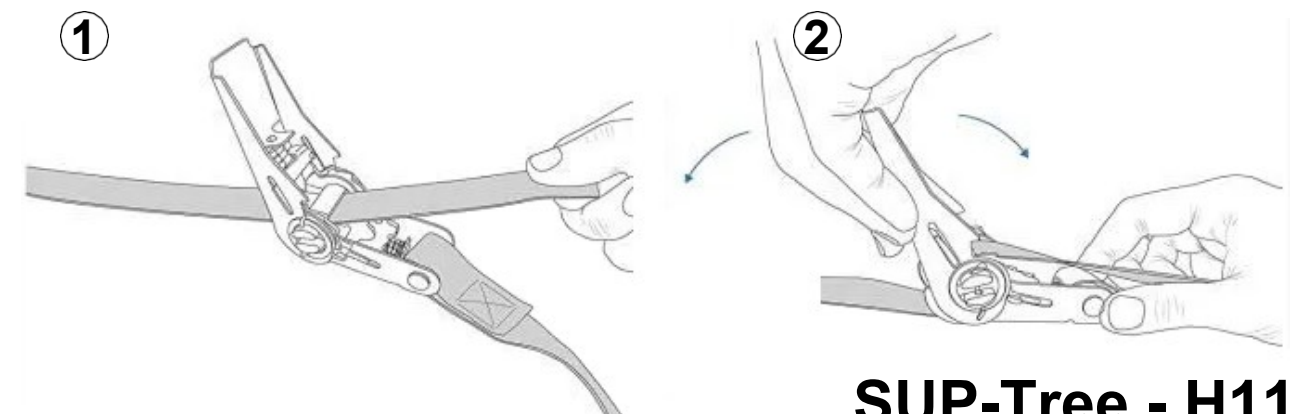

Attaching the straps

- Thread the two ratchet straps onto the pole and tree support.
- Ensure that the straps are not twisted.
- Place the post and tree holder against a tree or vertical structure.
- Insert the ratchets.
- Operate the ratchets until the support is securely fastened.
- Ensure that the bracket remains in position.
- Mount an outdoor spotlight on the bracket using the screws provided (M12 or M10).
- Install a safety hook using a sling suitable for the weight of the spotlight.

Using the ratchet hook

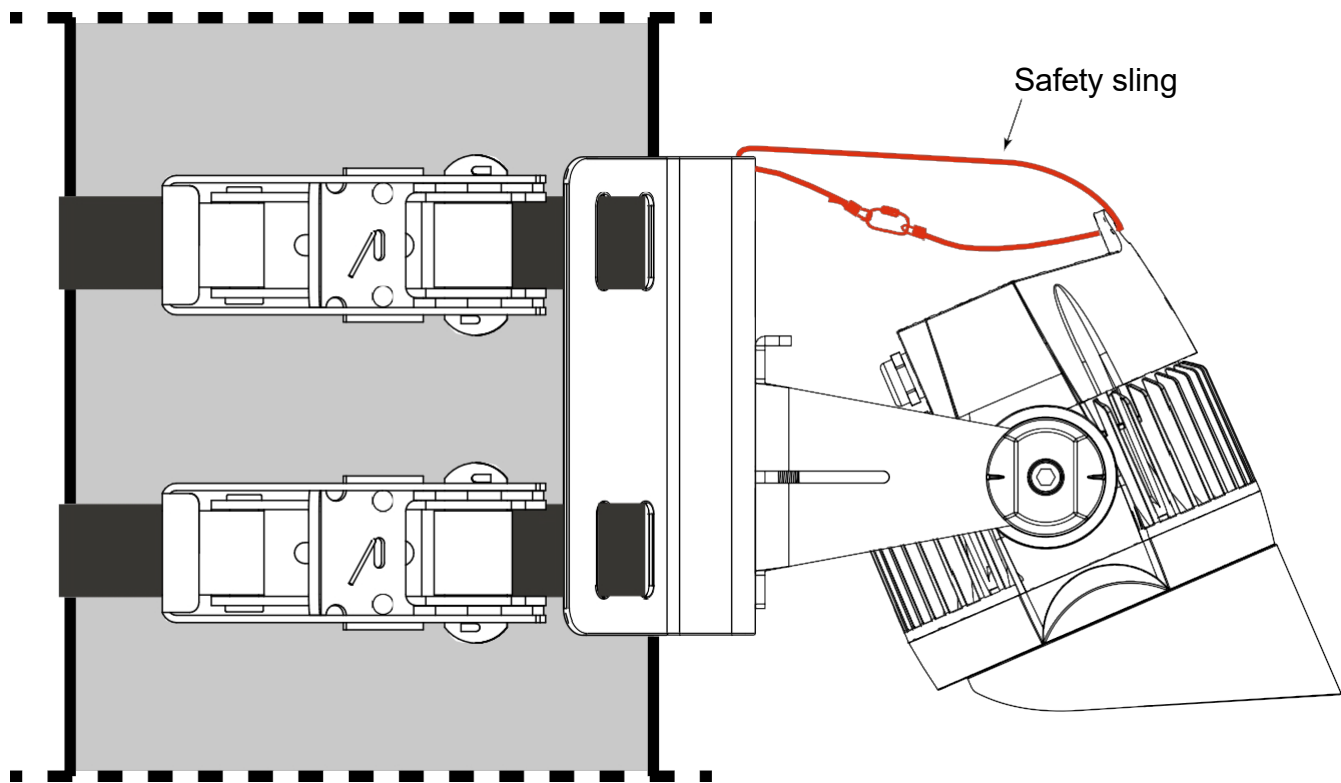

- While the second person holds the support, pass the strap through as shown in Figure 1
- Operate the hook lever as shown in Figure 2 until the necessary tension is achieved to hold the support securely in place.

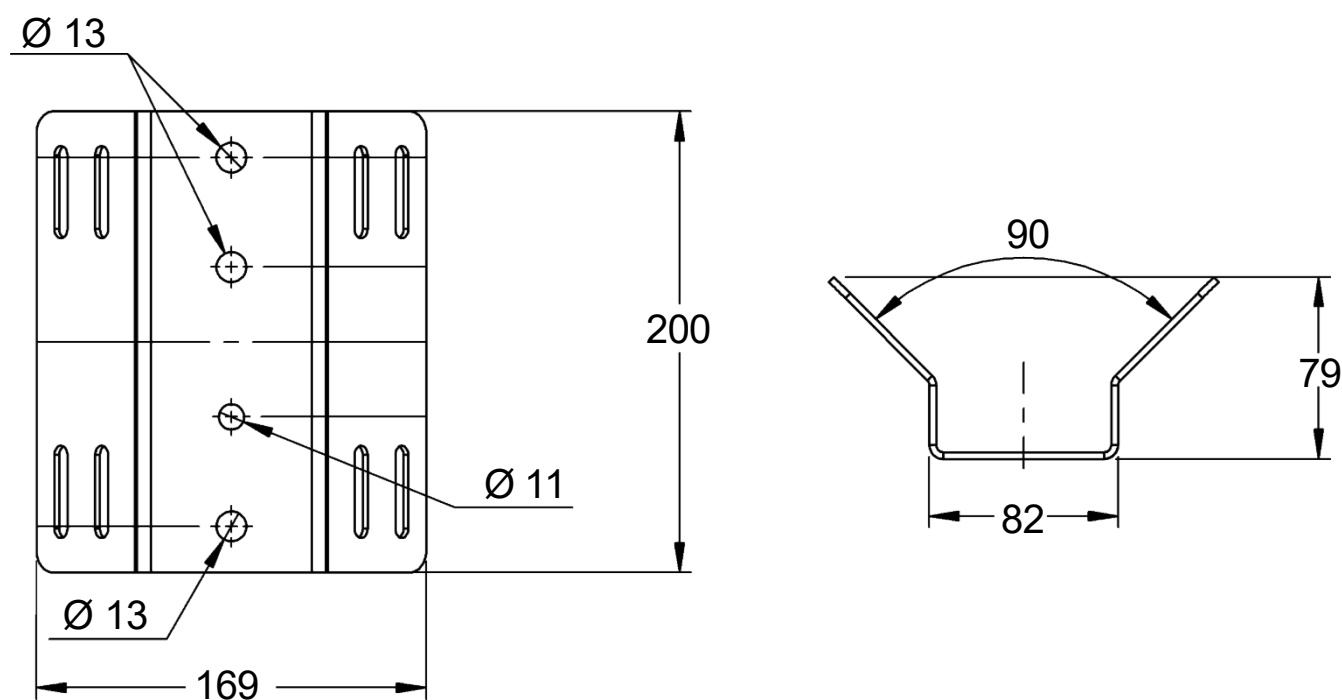

SUP-Tree - H11813

Finalising the installation

- The figure below shows the SUP-Tree correctly installed.
- Do not forget to secure the projector with a safety sling.

Dimensions

The weight of the attached device must not exceed 50 kg.

Caution:
Ensure that the post or tree is strong enough to safely support the weight of the bracket and its projector.
Also ensure that the assembly cannot slip out of its bracket. The straps must be replaced if they are damaged.

These supports are designed for temporary installation during events and must not remain in place permanently.

The SUP-Tree must be installed by two people.

The installation area for the SUP-Tree must be secure.
Ensure that no one is standing underneath it during installation.
